

## 2022 Outback Yachts 50'

**Price:** \$1,681,565  
**Make:** Outback Yachts

**Year:** 2022  
**Construction:** Fiberglass  
**Length:** 56 ft  
**Max Draft:** 3 ft in  
**Beam:** 15 ft 6 in  
**Fuel Capacity (Gallons):** 550

**Fuel Type:** Diesel  
**Fresh Water Capacity (Gallons):** 150  
**Number of Engines:** 2  
**Engine Make:** Volvo  
**Engine Model:** D6  
**Engine Power:** 480.00 HP

The Outback 50 yacht combines the expansive deck space of a 70-foot vessel, the exceptional performance and seaworthiness of a pilot boat, and the comfortable accommodations typically found on a 50-foot yacht. In addition, it offers the convenience of docking akin to that of a center console boat. We have meticulously crafted two distinct models, namely the Infinity Deck and the Extended Deckhouse, each designed to maximize comfort, performance, and overall enjoyment.

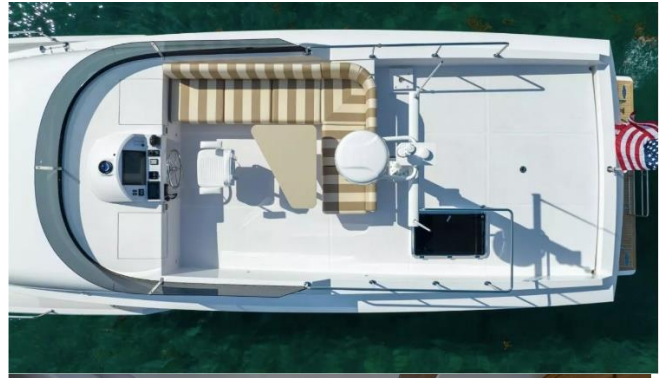

Both the Infinity Deck and Extended Deckhouse models feature an open transom, accompanied by a removable security railing, allowing the cockpit to seamlessly transform into an expansive "infinity deck." This design element creates a remarkable outdoor space that enhances the experience of being at sea. Furthermore, these models are available in two or three stateroom configurations, catering to couples, families, or guests who will be joining you on board. The versatile layout ensures that everyone can find their ideal retreat within the yacht's luxurious confines.

The Outback 50 embodies the perfect balance between comfort and performance, offering a unique yachting experience that combines spaciousness, maneuverability, and the pleasure of cruising in style.

Outback Yachts has revolutionized recreational yachting by prioritizing versatility, efficiency, and performance. Collaborating with the esteemed Michael Peters Yacht Design, the experienced Outback team has conceptualized a remarkable yacht that surpasses expectations. This vessel is incredibly adaptable, highly efficient, and exceptionally seaworthy, making it perfect for day trips, weekend getaways, or extended open water cruising. With its spacious outdoor deck and practical interior accommodations, it ensures safe and comfortable cruising experiences. The flagship model, the Outback 50, which is actually 56 feet in length, opens up a world of possibilities. Boasting a shallow draft of only 3 feet and a protective keel for its running gear, it reaches impressive speeds of up to 25 knots with its pair of 480 hp Volvo engines. For those seeking a customized version, it can be delivered in less than a year.

A distinguishing feature of this extraordinary design by Michael Peters is the placement of the engines and generator under the aft deck rather than under the salon sole. This arrangement eliminates the complexity associated with IPS or V-drive alternatives and results in a shorter length shaft compared to other conventional drive vessels. The strategic positioning of the fuel and water over the center of buoyancy ensures that trim is unaffected by fluid levels, and the weight distribution optimizes performance. As a result, the Outback 50 offers a smooth, quiet, and comfortable ride. Furthermore, it is highly economical, boasting an impressive range of approximately 1200 miles at trawler speeds.

Whether you're embarking on a day excursion, a weekend adventure, or a more extensive offshore cruise, the revolutionary Outback 50 presents endless possibilities for exploration and enjoyment on the water.
